The Self is a relation that relates itself to itself, or it is the relation's relating itself to itself in that relation. The self is not the relation; rather, it is that the relation relatates itself to itself. A human being is a synthesis of the infinite and the finte, of the temporal and the eternal, of freedom and necessity, in short, a synthesis. A synthesis is a relation between two terms. Considered in this way, a

human being is not yet a self.”

In the relation between two, the relation is the third as negative unity, and the two relate to the relation and in the relation to the relation; thus under the qualification of the psychical the relation between the psychical and the physical is a relation . If, however , the relation relates itself to itself, this relation is the positive third, and this is the self.
